

Abra Multi-Site Consolidation™

Feature Sheet

Specially designed for Abra HR®, Abra Payroll® and Abra Train® users, Abra Multi-Site Consolidation turns a time-consuming data gathering process into a smooth flow of information between remote and corporate sites.

Streamline Corporate-wide Reporting

By consolidating data among sites, you can analyze strategic, corporate-wide information at a glance with comprehensive standard or custom reports. Abra Multi-Site Consolidation lets you:

- Meet government requirements for corporate-wide reporting of EEO statistics, taxes, etc.
- Provide management with in-depth reports revealing statistical information such as salary, turnover, benefits and other critical data.

Simplify the Import and Export of Data

- Make routine transfers with the click of a mouse. Create and save unlimited export and import templates, specifying file and other transfer criteria.
- Import data from several remote sites with a simple keystroke. Or, use the Abra Organizer to schedule different transfer dates for specific sites. Each transfer appears automatically on your task list on the proper day - each month or period.
- Save set-up time and ensure consistency throughout your organization by transferring corporate code tables to remote sites. With code table sharing, Abra Multi-Site Consolidation manages information the same way your Abra HR and Abra Payroll systems are managed.
- Track transfers with built-in standard reports that give you complete consolidation history in a single view, plus detailed descriptions of all import and export templates.
- Choose the transfer method easiest for you, whether using your local or wide area network, or disk files.
